

## **Samindo New Fleet Ready to Operate**

**Jakarta, 4 June 2018** - PT Samindo Resources Tbk ("The Company"), an integrated coal mining services company in Indonesia, is seriously increasing its production capacity by purchasing heavy equipment. As previously stated, in 2018 the Company boosted capital expenditure by 300% more than last year. It is intended to increase the Company's operational capacity. From USD 13.8 million CAPEX allocated by the Company in 2018, all are used for the purchase of heavy equipment. The company plans to add 10 units of dump trucks and 1 unit excavator. Currently the heavy equipment has landed and ready to fully operate.

Since the decline in coal prices for the several years, the Company has temporarily delayed the purchase of heavy equipment. The rise in coal prices since last year automatically pushed coal operators to raise their production levels. In addition, since last year the Company has also booked a new contract with Bayan group. The new contract automatically requires additional new tools to support operations.

As the Company's commitment to provide the best service, the Company consistently monitor the latest technology developments in coal industry. The implications can be seen from the heavy equipment imported with the latest technology. One of them is the performance recording feature. It is useful to get data related to the performance of the equipment during operation. Since two years ago the Company had implemented Maintenance Management System, which is an early warning system related to the performance of heavy equipment. The more sophisticated recording system that is owned by the new heavy equipment would be very helpful to complete an analysis on the heavy equipment performance.

"Previously we needed additional tools to access data related to dump truck performance, with this new technology we can quickly access the data by using USB drive" said Zaki, Investor Relations Samindo. "In addition to the Bayan project, we are currently aggressively looking for new contracts, therefore gradually we continue to increase our operational capacity" added Zaki.

### **PT Samindo Resources Tbk in a Glimps**

Samindo Resources is an investment holding company with core competency in coal mining service for waste removal and coal getting, coal hauling and geological mapping & drilling. As an investment holding company, Samindo run the 4 production activities through 4 subsidiaries i.e. PT SIMS Jaya Kaltim, PT Trasindo Murni Perkasa, PT Samindo Utama Kaltim and PT Mintec Abadi.
